## **Deploy War File To Tomcat Using Jenkins Pipeline:**

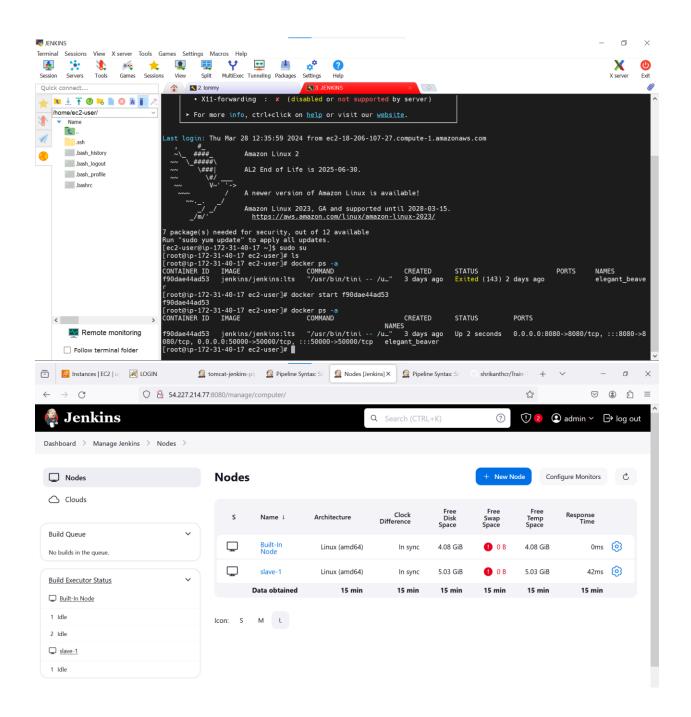

## **PREQUISITES:**

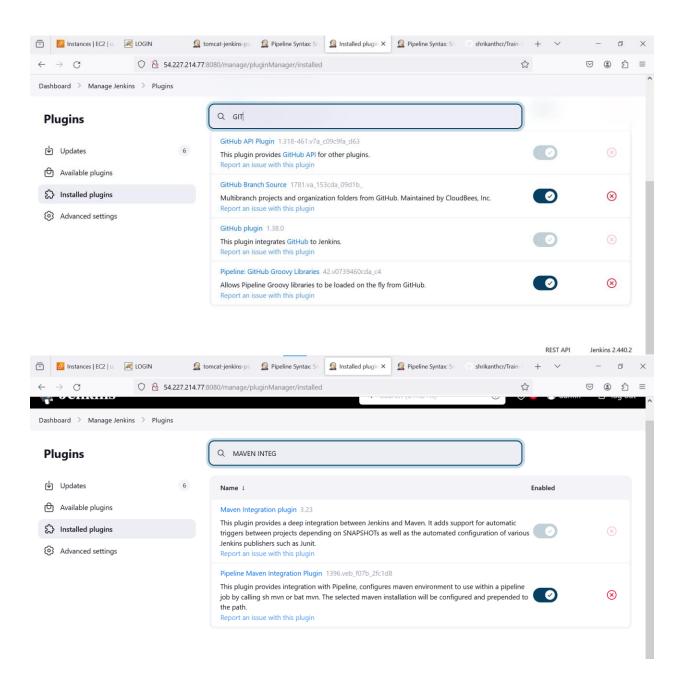

- 1) Installed Tomcat in one ec2-server.
- 2) Installed Jenkins in Another ec2-server.

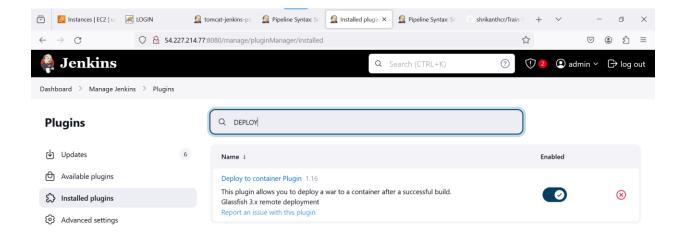

## **PLUGINS:**

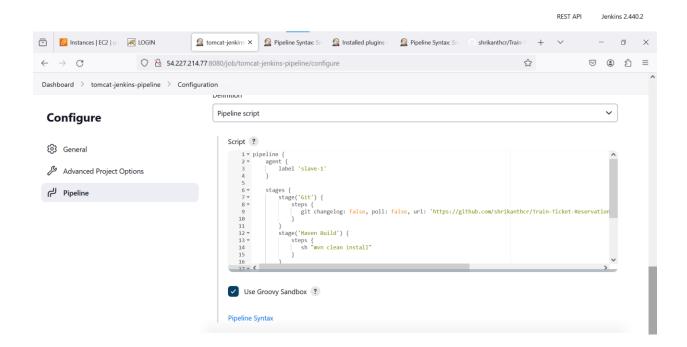

- 1) GIT HUB
- 2) MAVEN INTEGRATION
- 3) DEPLOY TO CONTAINER PLUGIN

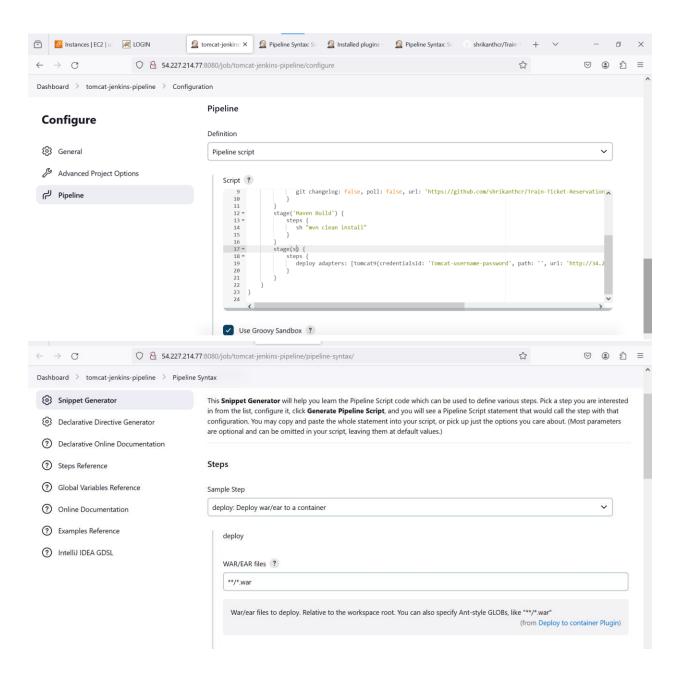

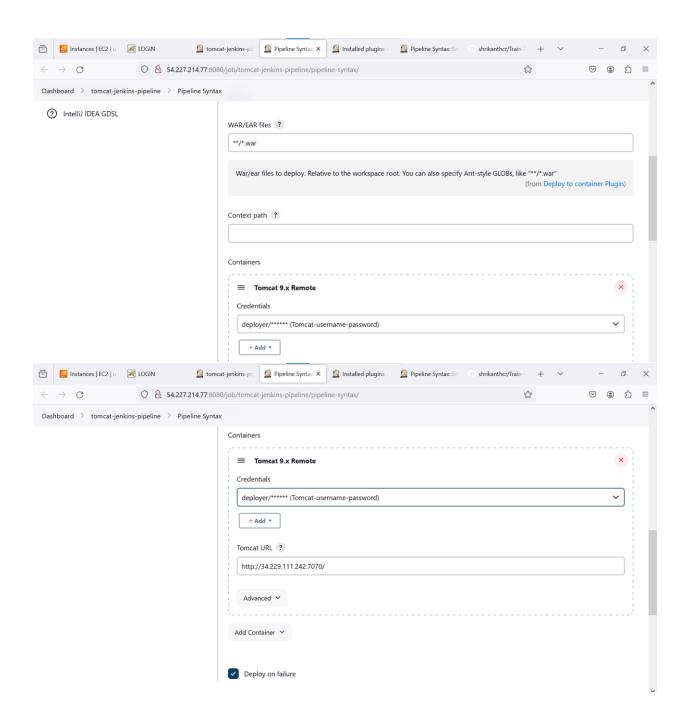

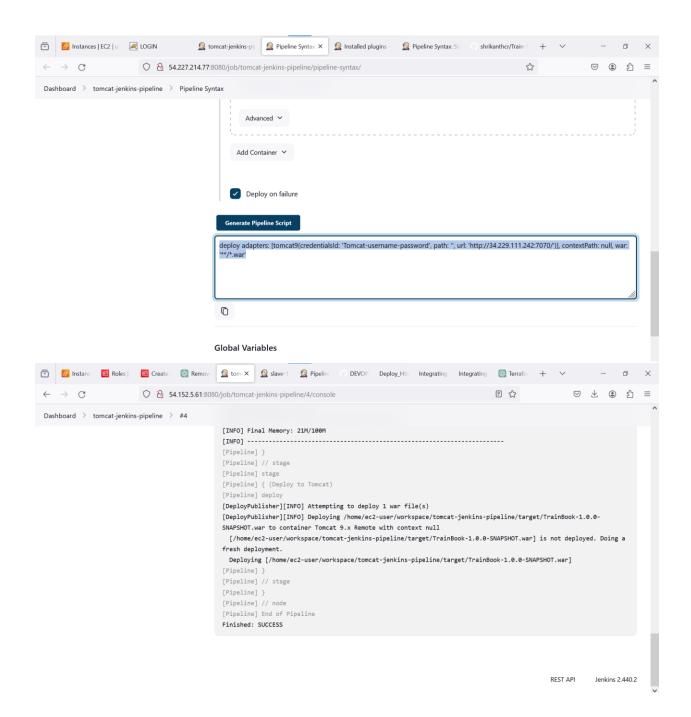

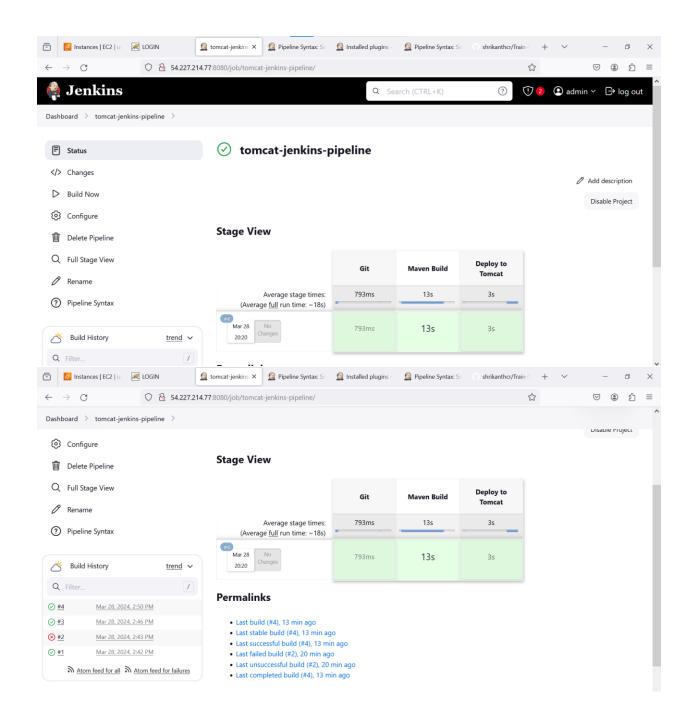

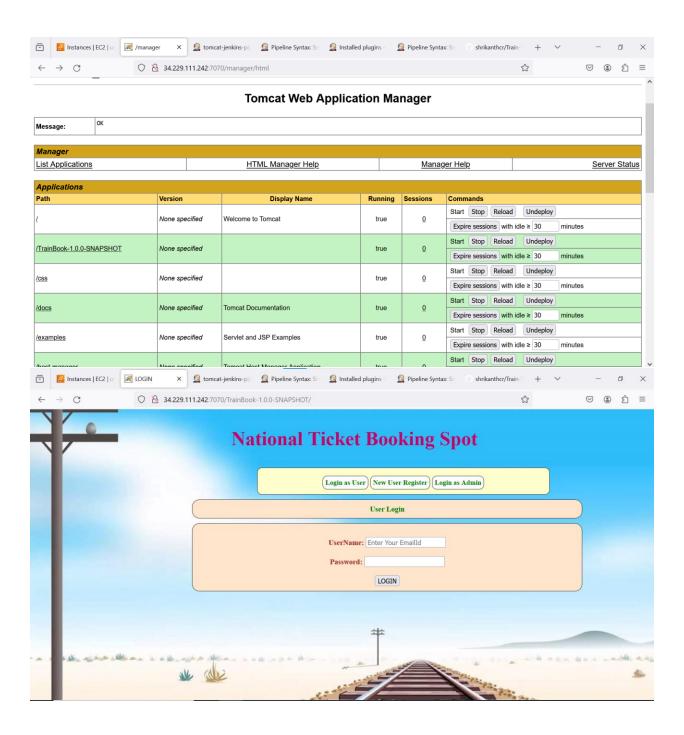

```
pipeline {
   agent {
    label 'slave-1'
```

```
stages {
    stage('Git') {
      steps {
        git changelog: false, poll: false, url: 'https://github.com/shrikanthcr/Train-Ticket-Reservation-
System.git'
      }
    }
    stage('Maven Build') {
      steps {
        sh "mvn clean install"
      }
    }
    stage('Deploy to Tomcat') {
      steps {
        deploy adapters: [tomcat9(credentialsId: 'Tomcat-username-password', path: ", url:
'http://34.229.111.242:7070/')], contextPath: null, war: '**/*.war'
      }
    }
 }
}
```
